

Wednesday, July 22, 2015 - Proudly Serving Satan, Part 2

Dealing with organizations that take stands opposed to Christian beliefs is an unfortunate part of living in this world. However, that does not mean we can't make our opposition to their positions known and, where available, choose to do business with those who do not openly stand for sinful practices.

In recent days there has been a list accumulated of companies that support the murder of babies through their contributions to Planned Parenthood. I am providing the link in this article.

I would request that you share this with everyone in your "friends" list, make a decision to do business with competitors of those on the list, write them as to why you are refusing to do business with them and, most importantly, prayer that this country wakes up before we incur the wrath of Jehovah God.
